- | | | | |
|----------|------------------|--------------|--------------------|
| • Python | • React.JS | • HTML & CSS | • PostgreSQL |
| • Django | • REST Framework | • Bootstrap | • MVT Architecture |
| • ORM | • GIT | • MongoDB | • OOPS |

EXPERIENCE

Software Developer Trainee – Django Full Stack Developer

Tinos Software & Security Solutions LLP
Kochi, India

2025

Learning Management System (LMS) – Virtual College Platform

Participated in building a full-featured Learning Management System to serve as a virtual college platform, targeting educational institutions and online learning environments.

- Contributed to 50% of the overall project including backend and frontend tasks.
- Developed using the Django framework with Bootstrap, HTML, CSS, and JavaScript for a responsive and user-friendly interface.
- Implemented Role-Based Access Control (RBAC) with five distinct roles: Admin, Student, Teacher, Guest Teacher, and Parent. Each role had permission-based access to features, ensuring secure and controlled system usage.
- Built dynamic interfaces and dashboards tailored to each user role and restricted unauthorized access to modules unless permissions were granted by the Admin.
- Ensured modular code structure and contributed to debugging, UI adjustments, and functionality testing.

Thaara Ai Chatbot Assistant for Document Query & Voice Response

Played a key role in designing and implementing a smart chatbot system for internal use, helping users query documents and receive spoken responses.

- Designed the chatbot frontend in HTML, CSS, and JavaScript, and connected it with Django-powered backend logic.
- Implemented text-based search functionality across PDFs and DOC files using pdf2txt and doc2txt Python libraries.
- Converted user queries into search instructions, retrieved matching content, and generated dynamic responses.
- Used JavaScript to integrate text-to-speech output, enabling voice-based delivery of chatbot answers.
- Deployed the complete project on Render, leveraging Gunicorn as a WSGI HTTP server to ensure production-grade performance and reliability.

PROJECTS

Nexus CRM – A Customer Relationship Management Platform for Banking Sales Executives 2025
GitHub

Live

Nexus CRM is a robust Customer Relationship Management platform designed to streamline business interactions, enhance customer engagement, and boost productivity. It offers core CRM features such as lead tracking, contact management, deal pipelines, and activity logging in a user-friendly interface.

- Frontend: Built a clean, responsive interface using **HTML, CSS, Bootstrap, and JavaScript**.
- Backend: Developed with **Python Django framework** following the MVT architecture. Used Django ORM and PostgreSQL for database operations.
- Authentication: Implemented secure user authentication and email verification.
- Deployment: Hosted on Render using Gunicorn.

Cretal – An E-commerce Platform for Sports Gear 2024

Live

GitHub

Cretal is an advanced e-commerce platform tailored for sports gear enthusiasts. It delivers a seamless and secure online shopping experience. The platform supports essential e-commerce functionalities, including product listing, cart management, order processing, and wish lists.

- Frontend: Responsive design with **HTML, CSS, Bootstrap, JavaScript**.
- Backend: Built with Django using MVT architecture and PostgreSQL.
- Integrated PayPal for payments and email verification for authentication.
- Hosted on Render using Gunicorn.

MINI PROJECTS

full-stack todo 2025

Live

GitHub

A Full Stack To-Do App using React (frontend) and REST API (backend). Hosted on Vercel (frontend) and Render (backend) for task management operations.

Topics to learn 2025

Live

GitHub

Topic listing platform built in React for tech students. Users can browse categorized topics via a responsive UI. Hosted on Vercel
